

Guiding Safety Principles

#RAMCARES

R Respect

RAM prides itself on a safety culture built on respect. All HSE issues are handled with the utmost care, diligence, privacy and respect for the reporting or involved parties.

A Accountability

At RAM, accountability means more than just doing our job. It includes an obligation to make things safer, to pursue HSE excellence, and to do things in ways that further the HSE goals of our organization. Our commitment to safety begins at the highest levels of the company. At RAM we understand that effective leadership and teamwork from all lines of business is imperative to a successful safety program.

M Management of Change

RAM is a rapidly growing company, we understand the importance of maintaining awareness to ensure that safety, health and environmental risks are identified and controlled as we continue to build our team of talented professionals.

C Conduct

At RAM our conduct defines who we are. Whether we are at the office, or at a project site, safety is our top priority and we ensure we are following safety policies, rules and requirements.

A Advancement

RAM is committed to maintaining a proactive approach to the development and maintenance of our safety program and culture. RAM strives to make continuous advances in industry best practices for safety.

R Reporting

At RAM, all accidents, incidents, near misses, and unsafe conditions will be reported to the appropriate party in a timely matter. Corrective actions will be created to avoid reoccurrence or prevent further illness, injury or damage.

E Environmental Stewardship

RAM is committed to protecting the environment by reducing its operational footprint and delivering efficient and sustainable services.

S Support

RAM supports and empowers their employees to embrace safety as a core value by providing resources for yearly safety training, task specific training, involving employees in the creation of policies and procedures, and encouraging all to take part in the Joint Occupational Health and Safety Committee.
