

CAREER OPPORTUNITY

PIPELINE CONSTRUCTION INSPECTOR

RAM is a technical consultancy providing Project Management, Construction Management, Engineering and Advisory services across Canada. RAM is proactively searching for a motivated and energetic Pipeline Construction Inspector to join its team in Vancouver, BC. The successful candidate will be an individual that enjoys a challenging, professional and dynamic work place and contributing to the success of a hard-working team.

➔ More About This Project and Role

The Vancouver Fuels Facilities Corporation is building a new fuel delivery system for the Vancouver International Airport. The system includes a new Marine Terminal, Fuel Receiving Facility and a 13km underground pipeline. As a pipeline inspector, you will be responsible for overall quality management of pipeline material and contractor execution.

Position Responsibilities include the following:

- Maintain an effective working relationship with the Client's staff, the contractor and other agencies.
- Communicate relevant inspection and project information to the Client's Project Engineer/ Manager, operations personnel, and other key project personnel. Report any site issues and potential delays or risks.

Our Core Values are:

1. Safety
2. Innovation
3. Integrity
4. Sustainability
5. Fun

- Abide by RAM's and Prime Contractor's safety program and WorkSafe BC Regulations and reporting unsafe activities to responsible supervisor.
- Attend preconstruction meetings and other project meetings as necessary. Produce meeting minutes where required.
- Monitor construction works to ensure compliance with the contract documents, which may extend to any or all part of the work.
- May be required to track cost and schedule data, verify Contractor's labour, equipment and materials use, and participate in review of Contractor's change requests or claims.
- Monitor the quality of work, identifying deficiencies in materials and workmanship and elevating as necessary.
- Inform the Project Engineer/Manager of any non-conformance to the contract documents and creates a non-conformance report for tracking.
- Maintain documentation and photographic record of inspected works, including completion of Daily Inspection Reports.
- May take as-constructed field measurements and red-line construction prints for record drawings.
- May be required to monitor adherence to permit requirements and safety regulations for approved, permitted crossings by inspecting work within a right of way and any third-party work around the Client's assets including;
 - Monitor contractors and equipment operators for excavation or blasting around assets, determining the effect of excavation/blasting activity on public safety, asset/system integrity and reliability;
 - Document excavation and inspection activities and working conditions;
 - Explain/enforce code compliance and company standards for all permitted work within rights of way and any non-permitted work in proximity to any assets.

➔ Ideal Candidate Requirements

Required Experience:

- 5 years of construction management experience, or a combination of less experience and a degree/diploma in civil or mechanical engineering.
- One or more of the following certifications:
 - API-1169
 - NACE Level 1 and/or 2 (Coating)
 - CWB Level 1 (Welding)
- Eligibility for registration at the technician's level (C. Tech.) by the Applied Sciences Technologists and Technicians of British Columbia, or as an EIT/P Eng. with Engineers and Geoscientists BC is considered an asset.
- Courteous, professional communication and interpersonal skills regardless of audience.
- Sound organizational and written communications skills, as well as working knowledge of computer/tablets, for preparation of a variety of external and internal reports, correspondence and other inquiries.
- Have working knowledge of construction standards, codes, permits and safety requirements.
- Valid British Columbia Driver's license.
