

CAREER OPPORTUNITY

JUNIOR PROJECT MANAGER – GAS & PIPELINE

RAM is a technical consultancy providing Project Management, Construction Management, Engineering and Advisory services across Canada. RAM is searching for a motivated and energetic Junior Project Manager (Gas & Pipeline) to join its team. The successful candidate will be an individual that enjoys a challenging, professional and dynamic workplace and contributing to the success of a hardworking team.

➔ More About This Project and Role

RAM's Project Management Team (PMT) are infrastructure delivery experts, from transportation to utility projects. Our experienced, in-house professionals have built cruise ship piers, rapid transit projects, utilities, overpasses, and highways for public and private clients. Due to extensive growth, our team requires a Project Manager (Gas and Pipeline) to be a part of our team.

Further Responsibilities include the following:

- Manage consultants/contractors and respond to technical inquiries;
- Create engineering deliverables in accordance with internal company standards for close-out purposes;

Our Core Values are:

1. Safety
2. Innovation
3. Integrity
4. Sustainability
5. Fun

- Update systems as required by the project closure process.
- Conduct field visits for quality management purposes;
- Gather data and information from within the engineering department regarding resource allocation
- Update the data when timelines change, or resources change;
- Prepare, develop, and report on project scopes, risk, schedules and budgets;
- Team leadership, including the coordination of resources;
- Meeting/workshop facilitation and leadership;
- Provide technical and administrative support through all phases of projects;
- Project Scheduling and cost estimate preparation;
- Contract administration;
- Stakeholder management and engagement;
- Permitting management;
- Communication management;
- First Nations engagement;
- Project reporting (via meeting minutes, project status reports/memos, etc.), and field reviews;
- Chair and attend project and site meetings and communicate directly with clients/sub-consultants/contractors; and
- Maintaining a respectful and professional working Relationship.

➔ Ideal Candidate Requirements

- Degree or Diploma in Mechanical, Civil, or Chemical Engineering;
- 2+ years experience working for an Engineering or Construction Company in a design or project coordination capacity;
- Experience working on gas transmission and distribution projects in Western Canada;
- Familiarity with CSA-Z662 Standards;
- Ability to provide monthly cost reports and financial tracking;
- Pleasant, calm demeanor and customer-service oriented; and
- Strong work ethic, ability to use tact and good professional judgement.
