

# CAREER OPPORTUNITY

## TECHNICAL PROJECT MANAGER

RAM is a technical consultancy providing Project Management, Construction Management, Engineering and Advisory services across Canada. RAM is searching for a motivated and experienced Technical Project Manager to join its team in Vancouver, BC. The successful candidate will be an individual that enjoys a challenging, professional and dynamic workplace and contributing to the success of a hardworking team.

### ➔ More About This Project and Role

You will provide professional engineering services to FortisBC for the design, construction and maintenance of natural gas transmission and gathering pipelines and associated facilities to accommodate the expansion, maintenance and integrity of the transmission and gathering pipeline systems. This includes the provision of technical services for engineering activities or project requirements, ensuring sound application of engineering and industry practices, technological advancements and identification and recommendation of effective business solutions to support departmental and Corporate FortisBC objectives.

*Additional responsibilities include:*

- Provide guidance and technical support to designers, drafters and members of the FortisBC engineering team;

Our Core Values are:

1. Integrity
2. Innovation
3. Fun
4. Safety
5. Sustainability

- Provide technical training and guidance for FortisBC engineering co-ops and EITs.
- Complete mandatory FortisBC training as required on SuccessFactors.
- Complete pipeline and facility designs and calculations in accordance with CSA Z662 and ASME B31.3;
- Develop technical specifications in accordance with FortisBC Standards, Specifications and project requirements;
- Coordinate, manage, and control of all engineering related aspects of the projects including Class 3, 4 and 5 cost estimates, FEED studies and detailed engineering and project closure as required by FortisBC;
- Review and seal technical memorandums, engineering assessments, and drawings;
- Review and provide technical input on all RFP Packages, as well as provide technical review and advice during the bid evaluations;
- Liaison between FortisBC's Engineering team and RAM Engineering team;
- Liaison between FortisBC's Engineering and Operations groups and RAM Engineering team;
- Conduct site surveys and inspections as required;
- Provide technical support and guidance to field personnel;
- Attend meetings with FortisBC, stakeholders and RAM Engineering internal resources;
- Follow FortisBC's engineering processes and procedures; and
- Provide input to develop checklists and processes for use within the engineering team.

### ➔ Ideal Candidate Requirements

- 5+ years of experience working as a Project Manager for an Engineering or Construction Company;
- Bachelor's Degree in Civil Engineering;
- Registered as a P.Eng with Engineers and Geoscientists BC;
- Project Management Professional (PMP) designation with the Project Management Institute (PMI) considered an asset;
- Knowledge and experience with pipeline design;
- Experience working on gas transmission and distribution projects;
- Demonstrated project leadership, organizational and time management skills;
- Effective verbal and written communication and presentation skills with project stakeholders, the public, clients, regulatory agencies and consultants/contractors;
- Experience assisting with the management of sub-consultants and contractors; and
- Experience with site inspections during construction.

### ➔ Why You Should Join RAM
