

CAREER OPPORTUNITY

PIPELINE INSPECTOR

Our Core Values are:

1. Integrity
2. Innovation
3. Fun
4. Safety
5. Sustainability

RAM is a technical consultancy providing Project Management, Construction Management, Engineering and Advisory services across Canada. RAM is searching for a motivated and experienced Pipeline Inspector to join its team in Vancouver, BC. The successful candidate will be an individual that enjoys a challenging, professional and dynamic workplace and contributing to the success of a hardworking team.

➔ More About This Role

- Maintain an effective working relationship with the Client's staff, the contractor and other agencies.
- Communicate relevant inspection and project information to the Client's Project Engineer/ Manager, operations personnel, and other key project personnel. Report any site issues and potential delays or risks.
- Abide by RAM's and Prime Contractor's safety program and WorkSafe BC Regulations and reporting unsafe activities to responsible supervisor.
- Attend preconstruction meetings and other project meetings as necessary. Produce meeting minutes where required.
- Monitor construction works to ensure compliance with the contract documents, which may extend to any or all part of the work.

- May be required to track cost and schedule data, verify Contractor's labour, equipment and materials use, and participate in review of Contractor's change requests or claims.
- Perform Quality Assurance on behalf of Client, monitoring the quality of work, identifying deficiencies in materials and workmanship and elevating as necessary.
- Inform the Project Engineer/Manager of any non-conformance to the contract documents and creates a non-conformance report for tracking.
- Maintain documentation and photographic record of inspected works, including completion of Daily Inspection Reports.
- May take as-constructed field measurements and red-line construction prints for record drawings.
- May be required to monitor adherence to permit requirements and safety regulations for approved, permitted crossings by inspecting work within a right of way and any third-party work around the Client's assets including:
 - Monitor contractors and equipment operators for excavation or blasting around assets, determining the effect of excavation/blasting activity on public safety, asset/system integrity and reliability;
 - Document excavation and inspection activities and working conditions; and
 - Explain/enforce code compliance and company standards for all permitted work within rights of way and any non-permitted work in proximity to any assets.

➔ Ideal Candidate Requirements

- API 1169 Pipeline Inspection certification is required.
- One or more of the following certifications: NACE Level 1 and/or 2 (Coating), CWB Level 1 and/or 2 (Welding).
- Knowledge of operation of mechanical and electrical testing equipment.
- Working knowledge of local construction standards, codes, permits and safety requirements.
- Experience with HDD installations.
- Familiarity with industry used software such as Bluebeam and other inspections software.
- Effective verbal and written communication and presentation skills with project stakeholders, the public, clients, regulatory agencies and consultants/contractors.
- Class 5 Driver's License and Vehicle.

➔ Why You Should Join RAM
