RAM is a technical consultancy providing Project Management, Construction Management, Engineering and Advisory services across Canada. RAM is searching for a passionate Project Engineer for its project team in Vancouver, BC. The successful candidate will be an individual that enjoys a challenging, professional, and dynamic workplace and contributing to the success of a hardworking team.

### → Key Responsibilities

- The coordination, management and control of all engineering related aspects of the project;
- Have a full and in-depth understanding of all Engineering and technical related drawings, specifications and documents for the project;
- Assist the Engineering Advisor, as required, in completing the Value Engineering portions of the project. This includes managing the process to ensure schedule and costs are met;
- Assist the Construction Manager and Project Director on all engineering and technical matters, as required;
- Review and provide technical input on all RFP Packages. This includes ensuring all necessary technical specifications and all other required engineering documents are incorporated, as well as provide technical review and advice during the bid evaluations;
- Assist the Procurement Manager with technical review and input into project Engineered Equipment bid packages. This includes ensuring all necessary technical specifications and

all other required engineering documents are incorporated, as well as provide technical review and advice during the bid evaluations;

- Assist in or lead the project controls functions including creating schedules and creating and updating cost estimates and forecasts.
- Be the point of contact for contractors, for any technical related issues;
- Track and facilitate the execution of any technical Design Change Notices (DCN), Project Change Notices (PCN), Change Requests (CR), Change Orders (CO), and Requests for Information (RFI);
- Provide oversight and manage the Engineering Consultants completing any project design changes;
- Provide mentorship and guidance to the project Field Engineers; and
- Provide On-site support as required. This includes review and advice on QA checks, providing input and recommendations to site driven changes and attend project meetings.
